

UDP-PDR Hotspot Traffic Scenario

Five highest-ranked background OD pairs shared by H40, H60, H80, H90, and H100+

Actual directed background flows

H level also changes the offered rate per flow.

H40

24 flows

H60

32 flows

H80

32 flows

H90

48 flows

H100+

48 flows

Five pairs shown = 10 directed flows · representative paths at t=0
